

9. Halogenated aliphatic organic compounds

bis (2-chloroethoxy) methane	halogenated aliphatic hydrocarbon (all)
bis (2-chloroethyl) ether	hexachlorobutadiene
bis (chloromethyl) ether	alpha-hexachlorocyclohexane
bromodichloromethane	beta-hexachlorocyclohexane
bromomethane	delta-hexachlorocyclohexane
bromochloromethane	hexachloro-cyclopentadiene
bromodichloromethane	hexachloro-ethane
bromoform	2-chloro-1,3-butadiene = chloroprene
dibromochloromethane	2-chloroethanol
1,2-dibromo-3-chloropropane	2-chloroethyl-vinylether
1,2-dibromoethane	chloromethane
dibromomethane	chloromethyl methyl ether
dichloro-difluoromethane	chloroform
dichloroethane	pentachloroethane
1,1-dichloroethane	carbon tetrachloride = tetrachloromethane
1,2-dichloroethane	tetrachloroethane
dichloroethylene	1,1,1,2-tetrachloroethane
cis-1,1-dichloroethylene	1,1,2,2-tetrachloroethane
cis-1,2-dichloroethylene	tetrachloroethylene
cis-1,2-dichloroethylene	tribromomethane
trans-1,2-dichloroethylene	trichloroethane
dichloromethane	1,1,1-trichloroethane
dichloropropane	1,1,2-trichloroethane
1,3-dichloropropylene	trichloroethylene
2,3-dichloropropylene	trichlorofluoromethane
cis-1,3-dichloropropylene	1,1,2-trichlorotrifluoroethane
trans-1,3-dichloropropylene	1,2,3-trichloropropane
epichlorohydrin	tris (2,3-dibromo-propyl) phosphate
ethylchloride	vinyl chloride
phosgene	other
